About us

Our factory is located near the town of San Pa tong, about 35 km from Chiang Mai, the capital of Northern province in Thailand.

The production is based on fresh seasonal organic raw material, certified harvesting near the factory amidst carefully selected plantations.

We are certified IFS 7.0, Hallal, Kosher and all our farms are under Ecocert Organic certification (EOS + NOP).

Specifications & samples available upon request, factory visits welcomed.

ORGANIC FROM THAILAND

Steel drums 185 kg

LDPE bags 10 kg (Low Density PolyEthylene)

Our products

All our products are pasteurized, cooled and filled in the chosen package according to our safety food program and HACCP plan. Last step consists to store them in our cold room at -20°C awaiting for loading and shipping. A shelf life of 2 years has been certified for all of them.

Juice or puree are in fact the same product, some are called juice as they are more fluids than others (e.g: mangosteen vs pineapple).

Some products are available in 'crush' (pineapple, lychee, ginger, turmeric), for those ones fibers extracted from the fruit when doing juice are added to this juice before pasteurization resulting in a product with high fibers level. For the others fruits, fiber can be replaced by seeds (passion fruit, red dragon) or by pericarp for mangosteen.

All our products are NFC (Not From Concentrate), 100% organic fruits.
